strong signal, min. targets = 10
strong signal, min. targets = 30
weak signal, min. targets = 10
weak signal, min. targets = 30
True MRs evaluable (of 10)
AUROC, all TFs (non−evaluable = undetected
Fraction of true MRs in top−10 |NES|
Mean over replicates (+− s.e.)
Samples used for network inference (n, log scale)
corto, fixed p = 1e−8 (log2TPM)
Scheme A: corto, ranks, |r| >= 0.2, top−100
ARACNe3, full consolidated
Scheme B: ARACNe3, top−100
True network (upper bound)
